OUR BEAUTY *philosophy.*

Beauty should be fun and every woman should feel confident in her own skin.

We're all about teaching women how to accentuate their true beauty. Most gals have a drawer full of makeup and tools that they don't know how to use. Others aren't quite sure how to work around medical issues like Bell's Palsy, Alopecia or Trichotillomania.

Our beauty lab is the place where they can learn all those empowering tricks of the trade that will have them feeling good and looking great.

THE SCIENCE OF GREAT *skincare.*

State-of-the-art skincare starts here. Together with our Medical Liaison and renowned dermatologist, Dr. Ruth Tedaldi of Wellesley's Dermatology Partners and NECN's "The Tedaldi Treatment," we offer beauty treatments backed by the latest scientific advances, so you can feel good knowing that you're getting the best results from the most experienced and trusted hands in the industry.

SKINCARE

Our focus is clean, healthy skin, so we like to keep our skincare regimens simple, yet effective. We carry the best, user-friendly skincare products on the market today, including our own line of Prettyology™ makeup, brushes, tweezers and scissors. And, we are the first and only beauty lab in Boston to carry HydroPeptide®, an award-winning skincare line that uses twenty-one of the most effective peptides to stimulate collagen production and improve the look and feel of your skin. For the ultimate skincare pick-me-up, Dr. Tedaldi will be available on Fridays for injectables including BOTOX®, Dysport®, Restylane®, Juvéderm®, Sculptra® Aesthetic and more.

SKIN TREATMENTS

These dermatologist-created facial protocols yield the most visible results outside of a doctor's office.

WRINKLE WARRIOR

Our signature treatment fills in fine lines and plumps up dehydrated, dry and mature skin. This relaxing, no "down-time" treatment does a one-two punch on wrinkles with the restorative and uplifting benefits of peptides, growth factors and proteins. First, a two-step peel sloughs off dead skin to reveal the fresh, glowing skin underneath with Vitamin C-infused microdermabrasion crystals and a plumping activator. Next, a hybrid treatment mask purifies with bentonite and kaolin clays while wrinkle-fighting peptides leave skin looking firm and rejuvenated. Au revoir, wrinkles.

TURN BACK TIME

This instant resurfacing treatment leaves skin baby-smooth and looking years younger with absolutely no down time. While botanical stem cells protect your skin from external stressors (and who doesn't have those), active peptides rejuvenate and revitalize your face. Science meets nature meets beautiful you. Perfect for reducing the appearance of fine lines and wrinkles, hyperpigmentation and dull or rough skin.

BRIGHTEN-UP

Pesky skin problems, be gone. This treatment evens out, lightens and brightens the appearance of age spots, sun damage, acne scars, pregnancy mask and uneven skin tone. Best of all, it does so without using harsh chemicals. High-dose antioxidants brighten skin and gently exfoliate, leaving your complexion more peaches-and-cream lovely. A series of treatments is recommended for best results.

THE OM

Sometimes you need a gentler touch, but you still want your skin to look stunning. This calming, soothing treatment is perfect for gals with sensitive skin caused by rosacea, couperose or impaired barrier function. A gentle peel refreshes the skin without irritation, while a nourishing mask of peptides and botanical stem cells helps protect skin, restores hydration and reduces signs of redness.

ACNE ERASER

This clarifying treatment shows acne who's boss. Powerful exfoliators revitalize dull skin. Salicylic acid and acne-fighting peptides help clear skin of impurities, while natural exfoliants increase cell turnover to decrease the signs and appearance of sun damage. And, in no time, your face is on its way to looking clear and spot-free. Perfect for acne, dull complexions and photo-damaged skin.

Please note: we don't recommend this treatment for clients with rosacea or sensitive skin or who may be pregnant, nursing or allergic to aspirin. Those currently using an acne treatment (prescription OTC) or Retinol/Retin-A® must discontinue use for 3 days before and after treatment.

ANTI-STRESS EXPRESS

Our favorite express treatment is for those clients who try to do 10 things at once (and you know who you are). So schedule a little "me time" on your to-do list. We'll balance your stressed skin with stability peptides, hydrate it with echinacea stem cells and exfoliate with a cranberry pomegranate mask. Did we mention that all you have to do is lie back and relax?

LICKITY-SPLIT

Summer is great, but it can be a little naughty on your skin. So here's a quick, easy way to exfoliate and brighten without irritation or sensitivity. Enzymes and peptides keep skin perfectly nourished, antioxidants protect and hyaluronic acid infuses for total hydration. Great for all skin types.

THE SCIENCE OF GREAT *skincare.*

WHO SAYS GOOD LOOKS HAVE TO FADE? *micropigmentation*

This six-syllable word may be a mouthful, but with results that last one to 10 years, micropigmentation will be on the tip of everyone's tongue. Also known as cosmetic tattooing, it's the answer to pale lips, sparse eyebrows and fading lash and lip lines. Micropigmentation can also be used to improve the appearance of wrinkles, scarring and vitiligo and by using topical anesthetics beforehand, it's virtually pain-free.

But remember, your results are only as good as the person doing your micropigmentation. That's why so many women trust Prettology™. In 2005, Julie became the very first licensed micropigmentation artist in Boston. Since that time, she's designed a rigorous apprenticeship program that all of her Prettyologists must master.

If you did go to someone else for micropigmentation and aren't pleased with the results, we can help. We won't judge, we promise. Just schedule a consultation first and then we'll get to work fixing it. Remember, friends don't let friends walk around with bad permanent makeup.

pretty PROCEDURES.

All of our initial micropigmentation Pretty Procedures include a follow-up appointment within 3 months. After 3 months, any additional work is considered a touch up. We also make sure you leave our beauty lab looking fabulous with everything you need to maintain your results.

TOUCH UPS*

When you'll need a touch up depends upon your skin type, how natural the initial look was (soft blondes fade much faster than dark brunettes), your lifestyle (think sun exposure), prescription medications and the biggest culprit, anti-aging products and treatments. By all means, don't stop using anti-aging products, just be careful to avoid the area we have pigmented and advise your skincare specialists that you have had micropigmentation when having any type of procedure.

*Touch ups after 36 months may be considered as a new procedure.

More THAN SKIN DEEP.

Because Julie is a firm believer that beauty is more than skin deep, many of the services Prettyology™ offers are specifically designed to help women feel pretty and more confident when they need it most.

Clients with skin issues caused by medical conditions are near and dear to Julie's heart. That's why she's been personally involved in creating the protocols for the corrective procedures.

RESTORATIVE AESTHETICS

SCAR RELAXATION

Scar tissue/fibroblasts are needled and massaged in order to relax the appearance of the scar.

SCAR CAMOUFLAGE

After the scar is relaxed, we do something called pointillism. This procedure uses pigments in a range of matching skin tones to help blend the scar's appearance.

COLLAGEN INDUCTION THERAPY (MICRO NEEDLING)

The latest alternative to laser resurfacing is perfect for both wrinkle reduction and acne scarring with minimal downtime. To soften wrinkles, this technique stimulates collagen production and helps create a smooth complexion. CIT should be done three times, every two months during a six-month treatment period. It's not recommended for darker-pigmented skin (as it can cause hyperpigmentation) or for people with diabetes, herpes simplex cold sore breakouts and those who experience keloidal scarring.

Choose Collagen Induction Therapy for treatment for the eye area, upper lip, smile lines, forehead or for acne scarring.

AREOLA REPIGMENTATION

This procedure restores the look of the areola's natural color and 3-D appearance.

Clients with skin issues caused by medical conditions like alopecia, Bell's palsy, cancer, trichotillomania, etc. may be eligible for discounted rates on their Restorative Aesthetic Procedures. Please contact us for details.
